

Coloriage magique : Revoir les tables x2 à x5

The image shows a large grid of irregular shapes, each containing a multiplication problem. The grid is divided into six color-coded rows on the left, each with a range of numbers and a color name. On the right, there is a calculator window showing the calculation $10 \times 5 = 50$ and a 'FAUTES' (mistakes) section with three smiley face icons and checkboxes.
